

CUSTOMER SELF-INSTALLATION WAIVER

Dear 360 Brake Customer:

Congratulations on your decision to purchase a 360 Brake. We hope you'll be pleased with our brake.

Because this is a new and innovative motorcycle brake, it is not installed the same way traditional brakes are installed on motorcycles. The 360 Brake must be installed and tested by a professional mechanic trained, skilled and knowledgeable with the 360 Brake and its proper installation. Only professional mechanics, which have been properly trained should install or service your 360 Brake. We recommend that you do NOT install the 360 Brake yourself, unless you are a professional mechanic and knowledgeable about the 360 Brake.

Like any motorcycle brake, the 360 Brake can be over-taxed, improperly used or damaged through misuse. You must follow our guidelines on use limitations.

Every installation and any service to a 360 Brake must be done by closely following our written instructions. We provide those instructions by mail, facsimile or through our website www.360brake.com. We can also help you find a professional installer. Just contact us.

If you do not follow these instructions, you not only void our manufacturer's warranty, but you also waive any and all claims against the 360 Brake Company, LLC.

Acceptance & Waiver

By signing below, Customer acknowledges that Customer has received and read this CUSTOMER SELF-INSTALLATION WAIVER and acknowledges and agrees that the manufacturer's warranty will be voided, if the 360 Brake is not installed as instructed here or is improperly used. Customer agrees to follow all manufacturer's instructions and warnings, and further acknowledges having received and signed this Waiver before placing an order for a 360 Brake. Customer hereby agrees to all the terms, conditions and provisions in this waiver, including the general waiver of any and all claims against the 360 Brake Company, LLC.

So acknowledged and agreed, this date: _____, 2008.
